

## Emery Oleochemical Berhad

Intelligent is our nature

### Customer

- Customers service lobby
- MD's office
- Employee entrance
- Cafeteria
- Production floor

### Mission

Emery Oleochemicals is one of the world's largest Oleochemicals producer with a worldwide distribution. Formed as a 50:50 joint venture between Sime Darby Plantation and PTT Chemical International Pte Ltd is a wholly-owned subsidiary and the international investment arm of PTT Chemicals PCL. Emery Oleochemicals is headquartered in Malaysia but with a global presence in 3 continents with plants in North America, Germany and Malaysia.

With staff strength over 1,000, they are always facing with the challenge to keep every staff up to date about the company developments and activities. Citing the problem with the conventional notice board where notices are affixed in a non systematical and non chronological order, memo and notices are often being ignored and message did not transpire to the staff effectively.

### Solution

The idea of the electronic bulletin board ("EBB") was proposed to the management of Emery. This EBB will replace the conventional notice board installed throughout the plant. The EBB will be powered by the SpinetiX hyper media player and messages will be delivered through the professional LCDs installed at strategic locations such as employee entrance, main reception lobby, cafeteria and staff quarters.

SpinetiX was chosen for its compact size and eco friendly features which is inline with the company go green policy.

The EBB will be handled primarily by the Human Resource Department. Typical information publish on the display include:

- New staff onboard
- Latest company achievement
- Latest news
- Staff affairs
- Company activities
- Daily production capacity
- Latest production status

### Installation

- 7 units of SpinetiX HMP100
- 6 units of professional LCD Display
