

## Kencana Petroleum Berhad

### Result

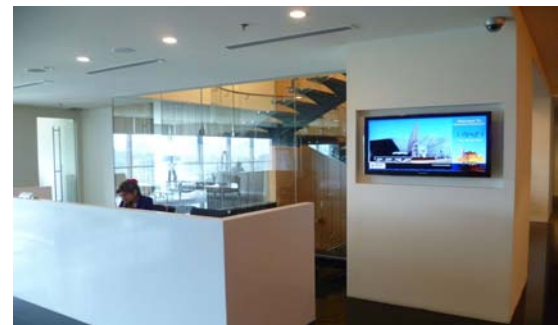

- 4 units of SpinetiX HMP100
- Visitor can watch latest world news and latest corporate information while waiting for appointment
- Daily update of company activities and news
- All contents are managed by the front reception

### Mission

The Kencana Petroleum Group today possesses an enlarged integrated services offering that encompasses its core business of providing Engineering and Fabrication services as well as new Marine Engineering and Operations Services businesses. With strengthened capabilities and expertise, a workforce of 5,000 employees and an international footprint encompassing the Asia Pacific region, Africa and the Middle East, the Kencana Petroleum Group is committed to driving strong performance and delivering exceptional value.

Kencana Petroleum has set two main criteria for the signage solution: -

- (a) Easy and user friendly implementation
- (b) Seamless operation with less maintenance

### Solution

SpinetiX HMP100 was chosen to implement in Kencana Petroleum new corporate HQ for its robustness and small form factor size without much renovation work required on its newly renovated office. The installation of SpinetiX takes less than an hour as no additional renovation and construction needed.

Information shown on the display include daily meeting schedule, corporate update, share information and company activities.

Future plan to include live streaming of ship building work in progress at the shipyard located up North in Perak state.
